

A photograph of a modern, two-story house with a light-colored stucco exterior and dark brown trim. The house features a covered patio area with dark columns. In the foreground, there is a lush, green synthetic lawn that appears to be made of ProGreen Synthetic Turf Systems. The lawn is installed in a curved, tiered fashion, creating a sense of depth and texture. The overall scene is bright and sunny, with clear blue skies and well-maintained landscaping, including some tropical plants and rocks.

PRO GREEN[®]
SYNTHETIC TURF SYSTEMS

Natural Prime

Ideal for medium-traffic applications, featuring a pristine appearance that can withstand the use of a typical yard. The S-shaped blades provide the ultimate softness and resiliency. Our ProFlow backing ensures superior drainage and maximum durability.
